

Development Team

Date: May 6, 2025

Name: Etsubdink Yetwale

Role: Frontend Developer

Projects: Ai Jake

Key Tasks:

- **"Check Inbox" Page Implementation:**
Designed and developed the UI for the `CheckInboxPage`, guiding users to check their email for a password reset link. Initially, the Poppins font was imported locally within this component.
- **Global Font Styling Optimization:**
Refactored the Poppins font import from the `CheckInboxPage` to the global `src/index.css` file. This not only ensured consistent typography across the entire application but also resolved prior linter warnings related to scoped style tags.
- **Layout and Component Refinement:**
Improved the layout and visual hierarchy of the `CheckInboxPage`. As part of this refinement, a newly developed `InputDesign` component was introduced and integrated to enhance design consistency and user input presentation.

Deliverables:

- Functional and styled `CheckInboxPage` UI
- `InputDesign` component integrated

- Poppins font applied globally via `index.css`

Challenges faced/support needed:

None currently; all tasks completed as planned
(or list any blockers or areas where input is needed)

Planned Work:

- Making Responsiveness
- Implement form validation for password reset
- Refactor shared authentication components for reusability
