Development Team

Date: May 7, 2025

Name: Etsubdink Yetwale

Role: Frontend Developer

Projects: Ai Jake

Key Tasks:

1. Enhanced Responsiveness of Authentication Pages

- **LoginPage** and **SignupPage**: Adjusted layout structure and padding to optimize for various screen sizes.

- **LoginForm** and **SignupForm**:

    - Improved responsive typography for headings such as "Ai Jake", "Welcome Back", and "Welcome to Ai Jake".

    - Reorganized the "Remember me" and "Forgot password?" section to stack vertically on smaller screens for improved usability.

2. Component Review for Responsiveness

- **AuthSidebar.tsx** (previously `InputDesign.tsx`): Confirmed that it is currently hidden on screens smaller than the `sm` breakpoint via the `max-sm:hidden` Tailwind class.

- **Button.tsx**: Reviewed and confirmed that the component is already well-configured for responsiveness and usability.

Deliverables:

- Updated responsive versions of the following pages:Sign up page andLogin page

Dimensions: iPhone SE ▼   375   ×   667   77% ▼   No throttling ▼

Challenges faced/support needed:

- **AuthSidebar Visibility on Small Devices**:

  - The sidebar is intentionally hidden on extra-small devices using `max-sm:hidden`.

  - This limitation was noted for possible future revision if visibility is needed on smaller screens.

Planned Work:

- Review and discuss whether to adjust **AuthSidebar** visibility on small screens.

- Continue development with other pending tasks as scheduled.
